Skills

Web Development Figma Linux
Git MySQL Flask Django
VS Code Flutter FastAPI NodeJS
Postman Airtable Notion Vim
Data Structures Algorithm Design
Mentoring Teaching

Strengths

Oral and written communication

Reliable and consistent

Committed to lifelong learning

Team player

Projects

My Little Diary - Android App

https://github.com/rjffas/my_little_diary

An Open-Source simple diary app built with flutter. Implemented bloc design pattern by separating the project into three layers. The project is completely standardized and follows all the best practices.

Alpha - Discord/Telegram bot

<https://github.com/rjffas/alpha-bot>

An AI powered discord/telegram bot using google's dialogflow API. The core logic of bot is built as a framework so that it can be used with any bot apis.

Project Man - Webapp

<https://github.com/rjffas/projectman>

Hassle free project management application built with python django, used tailwind css for building the beautiful minimal front-end

FC Times - Android App

https://github.com/rjffas/fc_times

An exclusive android app for students of farook college, with department wise timetable, exam notifications, events..etc, my first flutter application project

TinkerHub FC official website

<https://github.com/TinkerHub-Farook-College/tinkerhubfc-official-site>

Official website of TinkerHub farook college, initiated and lead the website project, completely built from ground up and hosted at tinkerhub.farookcollege.ac.in
